Update Driver Software - SAMSUNG Select the device driver you we Select the device driver you we Select the manufacturer and r disk that contains the driver y Model W/ Android ADB Interface Android ADB Interface Android Composite ADB Interface	Android ant to install for this hardware. nodel of your hardware device and then click Next. If ou want to install, click Have Disk.	f you h

	Installing this device driver is not recommended because Windows cannot verify that it is compatible with your hardware. If the driver is not compatible, your hardware will not work correctly and your computer might become unstable or stop working completely. Do want to continue installing this driver?	s you
--	---	----------

Open devices manage Now you see adb driver install successful

# 3. Install flash tool (QPST)

1. Install QPST tool very simply, Open QPST file and setup, then you only need to choice next step the same with USB driver
